Poriferous, LLC Signs Exclusive Distribution Agreement with Minogue Medical, Inc.

Agreement expands availability of SU-POR products to Canadian Market

Newnan, Georgia – January 28, 2016

Poriferous, LLC, an innovative medical device manufacturing company based in Newnan, Georgia, today announced that it has entered in an agreement with Minogue Medical Inc. as the exclusive distributor of SU-POR Surgical Implants in Canada. Minogue Medical is a leading Canadian specialty medical product distributor with a long history of distribution of porous polyethylene implants.

"Minogue Medical is a great partner for us and we are very excited that they will be representing the SU-POR brand of porous polyethylene implants in Canada. They have the expertise, reputation, clinical experience and complementary product portfolio to drive SU-POR Surgical Implants to a market leader in Canada," said Aaron Noble, CEO of Poriferous.

Danny Minogue, CEO of Minogue Medical said, "We are pleased with the opportunity to distribute SU-POR Surgical Implants. The SU-POR product line fits into our overall strategy to provide innovative medical technologies to the Canadian market. The innovation of the Poriferous team is reflected in the enhancements to quality and ease of use to the SU-POR brand of porous polyethylene implants."

Poriferous received its license from Health Canada earlier this month. SU-POR Surgical Implants are manufactured in Newnan, GA, USA, from high-density polyethylene and are designed for non-weight bearing applications of craniofacial reconstruction/cosmetic surgery and repair of craniofacial trauma.

About Poriferous, LLC
